

The Mountain Express Request for Proposal

ADDENDUM NO.1

DATE: September 10, 2019
PROJECT TITLE: Facility Needs and Cost Assessment

This Addendum is a formal addition to Mountain Express's (MX) Request for Proposals (RFP) dated August 26, 2019.

I. Inquiries from Potential Proposers and the MX Response

One inquiry was received by 5:00pm MDT on September 6, 2019.

Question:

The subject RFP states that the selected consultant shall develop construction bid documents.

Is this to mean you want 100% plans, specifications, and estimates so that you can go directly to a construction contract after this stage of work?

MX Response:

The Mountain Express requires enough background information and specifications to submit a grant funding application with an accurate cost estimate to the Colorado Department of Transportation. For the budget of the scope (\$60,000 total) we are not certain 100% plans, specifications and estimates can be developed along with a needs assessment. Therefore, we are asking proposers to provide us with a work program that can be accomplished within the budget allocated. We understand we may need to procure a design phase ahead of a construction phase.
